A erobic miles are a way to measure the energy output in a number of different activities. A $n$ aerobic mile is equivalent to the energy ex pended in jogging one mile. As you can see by this chart, three hours of moderate gardening will give you the same aerobic workout as jogging three miles.
If you have not been exercising at all, you should try to begin with physical activity equal to six miles a week then gradually work up to 10 or 15 .

1. Start to get fit - 6-7 aerobic miles a week
2. Build strength and endurance - 10-15 aerobic miles a week
3. To get in top shape - 20 or more aerobic miles a week
